Poverty Activist Programme

Volunteering in Africa and India

Welcome to CICD!

Dear student and future Development Instructor.

With your big heart beating for mankind, with your brain and hands ready for action, and with time and togetherness, you and we will make positive change. You will do this together with the many others who are working for necessary change.

In the first five months of the program you will immerse yourself into the many aspects of our fast changing world. You will dig deep into the driving forces of development, into how past events have influenced the political, economic and human landscape of our world today. You will get to know about what this means for The Poor - in the project country and also here in England.

During the first five months, you will also be part of the international community at CICD, running the school together with the rest of us.

Throughout the programme you will get to know the work ethics, productions and results of the Associations that make up the Federation of Humana People to People, who are the main players in the development projects.

Both the 5 months training period and the project period will also include preparing yourselves for the last one-month period of Bringing It to The Public. This is where you will bring what you have learned and done to many people. You will mobilise future teams by presenting what you and your team have carried out together with the local people at the project.

All the elements of the programme: the new learning, the practical actions, the debates within the team and with the people you meet, the obstacles you face, the results you accomplish, the team building and new friendships... all are important parts of your new experience.

The time for dreaming is now, as it is here that great things start!

Alone the world changes you – but together we change the world.
